

# Louis Nzavi

## Junior Frontend Developer

+44 (0)7500 357806 | [louismulinge@gmail.com](mailto:louismulinge@gmail.com) | [LinkedIn](#) | Hatfield

**Developer Portfolio:** <https://louismulinge.com/>

**Objective:** Actively seeking a Front-End Web/Javascript/React developer/Engineer role. I bring Front-End developer skills and a focus on delivering for customer experience while increasing revenue for the business.

---

### Technical Knowledge

Developing the **Front-End of web applications** and websites using:

**HTML5:** including accessibility best practices.

**CSS 3:** Responsive design, Flexbox & CSS Grid, Sass, CSS Modules and CSS frameworks.

**JavaScript:** ES6+, AJAX, API's - REST and GraphQL, Animation (Greensock & Three.js).

Graphing (d3.js) & Realtime (websockets and [socket.io](#)), TypeScript, Cypress, Jest, Webpack.

**React:** Hooks, context, Material UI, Redux.

---

### PROJECTS

#### **Portfolio website:**

My portfolio website was built using React. I built this website to showcase my projects and their Github repo and hosted via netlify.

#### **Social media agency website:**

This project was built using React and Styled components. The main hero section includes a video background. I worked on this website to learn more about React and hooks whilst creating a professional style website for a B2B client.

#### **TODO CRUD app:**

This project was built using HTML, CSS and JavaScript. The purpose of the project was to create an application that reads the data, edit and also delete that data. I also added validation to ensure the user does not submit blank inputs. You also have the ability to add multiple tasks on your app.

#### **Landing page feature:**

This project was built using HTML and CSS. This is a simple project to showcase a simple website landing page/section. The design is simple yet effective and responsive without using JavaScript.

#### **Restaurant reservation system:**

This project was built using React, Redux toolkit and TypeScript. The application is a basic reservation system for a restaurant when customers order.

---

## **EDUCATION**

### **Front-End Software Engineering Training**

*Jan 2022 - Jul 2022*

The Jump Digital School, *London*

### **GCSE & A-Levels**

*Jan 2010 - July 2014*
